## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 14-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 14, lines 7-8, "at least two plug elements formed on at least one of said middle piece and said end pieces" renders the claim inoperable since the embodiment would include the plug elements located at the same location as that of the receiving element as stated in lines 5-6 of the claim.

Lines 9-10, it cannot be understood how a plurality of "plug elements" is inserted into a singular "receiving element".

Note similar errors in claim 25 and claim 29.

In claim 18, lines 1-2, "at least one of said receiving elements" is vague and indefinite since none of the preceding claims defines a plurality of elements.

In claims 19-20, it is not clear which of the plug elements the "plug element" is referring to.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 14-32 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ozawa (5,144,718). Note that process of a product made in the product claim (e.g. extruded, injection molded, scoring) is given no patentable weight.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
